

Corporate Overview

Manage, Protect & Fulfill

OverDrive is a leading full-service digital distributor and technology provider. We enable publishers, libraries, schools, retailers, and corporate enterprises to securely manage, protect (via digital rights management/DRM), and fulfill their digital audiobooks, eBooks, music, and video through custom and end-to-end solutions.

Customer-Driven Solutions

Library

OverDrive serves a variety of marketplaces with **Digital Library Reserve®**, **School Download Library®**, **AudioBook Classroom™**, **College Download Library™**, **Corporate Download Library™**, **MIDAS** retail solution, **Content Reserve®**, and **Private Reserve** (see reverse for details on each). OverDrive's global client list includes hundreds of leading publishers and thousands of libraries, schools, retailers, and corporate enterprises serving millions of end users. We provide the technology infrastructure for such global leaders as HarperCollins, Random House, Hachette Book Group, McGraw-Hill, Scholastic, John Wiley, Borders, WHSmith Online (UK), Microsoft, Barnes & Noble, Waterstone's (UK), the National Association of Realtors, as well as dozens of community colleges and college bookstores. We also power digital catalogs for public library systems large and small, including major US markets such as New York, Los Angeles, Chicago, Boston, Seattle, and Miami, and internationally in Singapore, Mexico, Canada, Australia, and the UK.

Best Download Service

eBooks
audiobooks
music
video

Our customers benefit from the circulation or sales our solutions help drive. Three main categories define what we do (see reverse for more detail):

Manage: OverDrive enables the upload, hosting, and sharing of popular audiobooks, eBooks, music, and video, as well as local content. An easy-to-use admin portal simplifies content selection, purchase, and activity tracking via real-time reports. In addition, we provide expert training and support as needed.

Protect: Whether you're the rights holder or the public-facing channel, end users will be enabled to download your DRM-protected or unprotected content. We provide user authentication for OverDrive-hosted websites and integrate smoothly with your authentication if you're the host.

Fulfill: A single platform for audiobooks, eBooks, music, and video simplifies the browse and download experience on a custom-designed and hosted or existing website. Our free download software, OverDrive® Media Console™, enhances usability and portability of audiobooks, music, and video with advanced navigation, Transfer Wizard (to supported mobile devices), and accessibility features.

Technical Expertise & Innovation

Much of OverDrive's success can be traced to the innovative digital media ecosystem built from the ground up by our talented engineering team. We have developed intelligent and intuitive solutions for each step of the "manage, protect, fulfill" download process, as well as the user experience. OverDrive boasts extensive experience working with the most popular eBook formats, including Adobe PDF, Mobipocket PRC, Microsoft LIT, and the new industry standard EPUB. All the PDF & EPUB eBooks we distribute can be easily transferred to the Sony® Reader™. We also host a broad selection of iPod®-compatible audiobooks in WMA and DRM-free MP3 formats, along with music, and video in Microsoft® Windows Media® formats. As a principal member of the International Digital Publishing Forum (www.IDPF.org), OverDrive is strategically focused on driving and promoting standards for the rapidly evolving electronic publishing industry.
