Sora

The student reading app

Digital books for your school library

The right books for every student

Every student deserves an equal opportunity to succeed with literacy. Often, that success starts inside the school library. But budget cuts and time constraints can provide roadblocks to establishing a 21st-century collection that meets the learning needs of your tech-savvy student body.

The Sora K-12 reading app is a full-service ebook and audiobook platform that can help you overcome those challenges, further establishing the library as a critical resource for your school community and you as a literacy leader.

Accessible on virtually any device, Sora is a digital extension of your school library, providing affordable access to independent reading, curriculum books and supplemental titles to reach all your readers, no matter where they are.

Librarians are literacy leaders

Books are the primary tools educators use to teach. But when schools rely exclusively on print, it can be difficult to find the right book, at the right time, at the right price point. Sora helps you solve this problem by offering flexible, cost-effective reading options for your entire school community:

Industry-best catalog: More choice = more reading

Sora is backed by an industry-best catalog of millions of ebooks and audiobooks for schools, including (but not limited to!):

- Hot new releases
- Student favorites
- Read-Alongs
- Comics & graphic novels
- LOTE books
- Magazines

No-cost content + affordable books for every budget

Start with the free Sora Starter collection of always-available titles that comes with every Sora platform, then our team will work with you to build a customized, cost-effective digital collection to help your school achieve reading and learning goals.

Access for every reader

Sora is available 7/24 from any device – so whether your students are in the classroom or at home, their next reading adventure is never more than a tap away. Titles can also be downloaded for offline access.

Summer Reading

Whether you need five copies or 500 (or more!), Sora can help power your summer reading list. Plus, enjoy free access to Sora Sweet Reads, our annual summer reading program offering dozens of high-interest titles for students of all ages.

Public Library CONNECT

With Public Library CONNECT, students can use Sora to browse, search and borrow age-appropriate titles from the local public library's digital collection, providing them access to even more books.

Reading data & insights to help with decision-making

Authorized educators can access Sora data like time spent reading, books opened and more to gain real-time insights into how students are using your digital collection.

Free services: Tech support, content curation, training & outreach

Your Sora platform comes with a dedicated team of support and content specialists to make activation, implementation, training, curation and outreach easy – and it's all completely free!

Librarian superstars say…

> "The accessibility of reading digitally – such as the availability of audiobooks and being able to change things like front, size and background – is a game changer for so many students."
>
> **Molly Dettman,
> Teacher Librarian (OK)**

> "The reason we started with Sora was to offer equitable access to books for pleasure reading in our most rural districts, where students do not have access to a public library or well-developed school library. I love the fact that our most underserved, isolated students have the same choices as our students in more developed areas."
>
> **Chris Haught,
> Media Specialist (UT)**

> "What I love the most about Sora is that it allows students to not only read books that I've purchased for them, but with a free library card, they can also access the huge selection of public library books, all in one app. The number of books that gives them access to, whether in school or at home, is priceless."
>
> **Susan Forgas, Resource
> Management Associate (FL)**
